

ChemiGuard[™]

Spray-Pro 3000

TYPE 4

TYPE 5

TYPE 6

EN1073-2

EN149-5

EN14126

The chemical protective clothing is light and has good air permeability. The sewing surface is sealed with adhesive tape to effectively isolate harmful dry particles and liquid spraying. Type 4B 5B & 6B.

Product Details

- The outer layer features a microporous breathable film, and the inner layer consists of double non-woven fabric. This configuration ensures exceptional permeation protection against dust, liquid, blood, and bloodborne pathogens.
- The fabric is highly breathable, ensuring comfortable wear. It has successfully passed the EN14126 test for anti-biological hazards.
- Designed without flocks to minimize fiber pollution and equipped with an anti-static property suitable for painting, it includes a three-piece hood, butterfly sleeves, cuff thumb rings, an elastic waist, and a triangle crotch for comprehensive coverage and comfort.

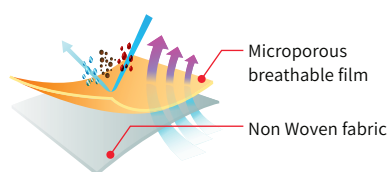

Applications

- Epidemic prevention
- Painting work
- Biopharmaceutical
- Radioactive particles protection in the nuclear industry
- Protects against accidental chemical splashes

Industries

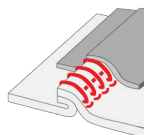

-  Hospitals
-  Chemical & Laboratories
-  Automotive
-  Pharmaceuticals
-  Manufacturing

Fabric Technology

Seam Structure

- Reinforced four-line stitching
- Stitch length: 3-4 stitch per CM
- Elegant and Sturdy
- Hard to crack

Packaging Information

1 Piece / Polybag
 50 Piece / Carton
 Carton Dimension - 52x38x40 cm
 Carton Weight - 14.20 kg / 31.30 lbs
